Customized Container Fuel Station Tank Diameter 2700mm Horizontal Tank Type

Product Description:

The Tank Containerized Refuel Facility comes with a horizontal tank type, which is ideal for storing and dispensing fuel. With a flow rate of 50m3/h, you can quickly and efficiently fuel up your vehicles and equipment without any delays.

The tank thickness of our Container Fuel Station is 14mm, providing a secure and reliable storage solution for your fuel. The tank

diameter of 2700mm is spacious enough to store a large amount of fuel, making it perfect for use in industrial settings.

Our Container Fuel Station is designed to be compact and easy to transport, making it an ideal solution for companies that require fuel distribution on the go. It is a part of our Containerized Fuel Distribution Bases, which are designed to be portable, so you can transport it to any location where fuel is needed.

With its durable construction, high flow rate, and large storage capacity, our Container Fuel Station is the perfect solution for any company that requires a reliable and efficient fuel distribution system. Whether you are operating heavy machinery on a construction site or running a fleet of delivery vehicles, our Container Fuel Station is the perfect solution for all your fuel distribution needs.

Applications:

The Virette A1 Container Fuel Station comes equipped with several tank accessories, including a manhole cover, emergency valve, level gauge, and discharge valve. These accessories make it easy to use and maintain, and ensure that the fuel supply is always safe and secure.

The Virette A1 Container Fuel Station is ideal for a variety of different applications. It can be used on construction sites to provide fuel for heavy equipment, on farms to power tractors and other machinery, and in remote locations where access to fuel is limited. It is also useful for emergency situations, such as natural disasters or power outages, where a portable fuel supply station is needed.

The Virette A1 Container Fuel Station is manufactured in China, and undergoes a rigorous quality control process to ensure that it meets the highest standards of safety and reliability. The tank surface treatment consists of sandblasting and painting, which provides a protective layer against rust and corrosion, and extends the life of the product.

In conclusion, the Virette A1 Container Fuel Station is a versatile and reliable product that can be used in a wide range of applications. Its skid-mounted design makes it easy to transport and maneuver, while its tank accessories and surface treatment ensure that the fuel supply is always safe and secure. Whether you need a portable fuel supply station for a construction site, farm, or emergency situation, the Virette A1 Container Fuel Station is an excellent choice.

Customization:

Customize your skid-mounted fuel station with Virette's Container Fuel Station product. Our model number A1 is made of high-quality carbon steel with a 14mm thick tank, ensuring durability and longevity. The tank has a capacity of 50m3 and measures 11600mm in length, with a cuboid shape. Our container gas station is manufactured in China, ensuring top-notch quality. With our Mobile Oil Supply Station product, you can customize the branding and design of your fuel station to meet your specific needs. Contact us today to learn more about our product customization services.

Packing and Shipping:

The Container Fuel Station will be securely packaged in a wooden crate to prevent any damage during transit. The crate will be sealed and labeled with the product details for easy identification.

Shipping:

We offer worldwide shipping for the Container Fuel Station. Shipping costs will vary depending on the destination and shipping method chosen. We use reputable shipping companies to ensure that your order is delivered safely and on time. Once your order is shipped, we will provide you with a tracking number so you can track your shipment's progress.
