# Cuboid 50m3 Mobile Fuel Station Carbon Steel Mobil Gas Station

# **Basic Information**

Place of Origin: ChinaBrand Name: ViretteModel Number: A1

# **Product Specification**

• Tank Type: Horizontal

• Tank Accessories: Manhole Cover, Emergency Valve, Level

Gauge, Discharge Valve

• Capacity: 50m3

• Pump: Self-priming Pump

• Tank Shape: Cuboid

Material: Carbon Steel

• Tank Thickness: 14mm

Color: Customized

• Highlight: 50m3 mobile fuel station,

cuboid mobil gas station, cuboid mobile fuel station

### **Product Description**

Self-priming Pump Mobile Oil Supply Station for Customized Requirements

### **Product Description:**

The tank surface treatment of this Fuel Station On Containerized Base is sandblasting and painting. This treatment ensures the durability of the tank and protects it from rust and corrosion. The tank is designed to be leak-proof and resistant to weather and other external factors, making it ideal for outdoor use.

The Container Fuel Station comes equipped with a self-priming pump, which makes it easy to dispense fuel. The pump is designed to be efficient and reliable, ensuring a steady flow of fuel for all your needs. The self-priming pump is easy to operate and requires minimal maintenance, making it an ideal choice for those who need a portable fuel supply station that is reliable and easy to use. The tank shape of this Fuel Station On Containerized Base is cuboid, which provides a more stable and secure base. The cuboid shape of the tank also makes it easier to transport and install, providing a convenient solution for those who need a portable fuel supply station.

of the tank also makes it easier to transport and install, providing a convenient solution for those who need a portable fuel supply station. The Container Fuel Station is a versatile product that can be used in a variety of settings. It is ideal for construction sites, mining operations, farms, and other industrial settings where fuel storage and dispensing are needed. The containerized base of this fuel station makes it easy to transport and install, providing a convenient solution for those who need a portable fuel supply station.

In conclusion, the Container Fuel Station is a reliable and efficient solution for all your fuel storage and dispensing needs. Its horizontal tank type, sandblasting and painting surface treatment, self-priming pump, tank length of 11600mm, and cuboid tank shape make it an ideal choice for those who need a portable fuel supply station that is durable, efficient, and easy to use.

### Applications:

The Container Fuel Station is suitable for use in remote areas, construction sites, mining operations, military bases, and other locations where conventional fuel stations are not available. It is an ideal solution for companies that need to store and dispense fuel for their fleet of vehicles, generators, or other equipment.

The Virette A1 Fuel Station On Containerized Base has a tank diameter of 2700mm and a capacity of 50m3. The tank's surface treatment is sandblasting and painting, and the tank shape is cuboid. The color of the tank can be customized to fit the customer's needs.

The Container Fuel Station is designed with safety in mind. It comes with a range of safety features, such as a fire extinguisher, emergency stop button, and grounding wire to prevent static electricity.

The Virette A1 is an excellent solution for those who need a reliable, cost-effective, and easy-to-use fuel storage and dispensing system. It is easy to transport and install, making it an ideal choice for temporary or permanent fuel storage and dispensing.

The Container Fuel Station is also ideal for use in disaster relief efforts, where fuel is needed to power generators and other equipment. It can be quickly deployed to areas that have been affected by natural disasters, providing a reliable source of fuel for emergency responders and relief workers.

In summary, the Virette A1 Fuel Station On Containerized Base is a versatile and reliable solution for fuel storage and dispensing. It is designed to meet the needs of a variety of application occasions and scenarios, making it an ideal choice for companies, organizations, and government agencies that need a safe, cost-effective, and easy-to-use fuel storage and dispensing system.

### **Customization:**

Add the necessary tank accessories such as the manhole cover, emergency valve, level gauge, and discharge valve to ensure a safe and efficient fueling process.

Equipped with a self-priming pump, the Virette A1 Portable Fuel Supply Station is a reliable mobile oil supply station that can be customized to meet your specific needs.

### **Packing and Shipping:**

### **Product Packaging:**

The Container Fuel Station product will be securely packed in a durable and sturdy container to ensure it arrives in good condition.

The container will be sealed to prevent any damage or tampering during transport.

The packaging label will include the product name, weight, and handling instructions.

### Shipping:

The Container Fuel Station product will be shipped via a reputable and reliable shipping service.

Shipping costs will be calculated at checkout and will depend on the destination and weight of the package.

Customers will be provided with a tracking number to monitor the progress of their shipment.

Shipping times may vary depending on the destination, but we will do our best to ensure your package arrives as quickly as possible.

### FAQ:

Q: What is the capacity of the Virette A1 Container Fuel Station?
