- Highlight: container fuel station 50m3,
container fuel station 50m3/h,
50m3 containerized fuel station

Product Description

Self-priming Pump Container Fuel Station with 50m³/h Flow Rate and Tough Carbon Steel

Product Description:

The tank shape is cuboid, which means it is compact and easy to transport. The tank is also treated with sandblasting and painting to ensure its longevity. This treatment helps to prevent rust and corrosion, extending the life of your fuel station.

Our Container Fuel Station comes equipped with several tank accessories, including a manhole cover, emergency valve, level gauge, and discharge valve. These accessories are essential for the proper functioning of your fuel station and ensure a safe and efficient fueling process for your customers.

This container gas station is perfect for businesses that require a mobile oil supply station. The compact and durable design make it easy to transport, while the customizable color ensures that it will match your business' branding.

Whether you're in the construction or logistics industry, our Container Fuel Station is an excellent choice for your fueling needs. The Fuel Station On Containerized Base is designed to provide a safe and efficient fueling process for your customers, helping you to save time and money in the long run.

Applications:

The tank's surface treatment is sandblasting and painting, which means it's durable and can withstand harsh weather conditions. Its tank diameter is 2700mm, and it's made of carbon steel, making it a reliable product to use for a long time. The self-priming pump adds convenience to the users by allowing them to pump fuel without the need for additional tools or equipment.

Product Application Occasions

The Virette Model A1 Tank Containerized Refuel Facility is perfect for various application occasions, including:

Construction sites

Remote areas

Emergency situations

Mining sites

Marine vessels

Product Scenarios

The Virette Model A1 Tank Containerized Refuel Facility is perfect for various scenarios, including:

Containerized fuel distribution bases

Portable fuel supply station for military camps

Remote area fuel supply for agriculture and forestry

Emergency fuel supply for disaster relief

The Virette Model A1 Tank Containerized Refuel Facility is a reliable and efficient product that can help you save time and money while providing a safe and convenient fuel supply. With its durable tank and self-priming pump, you can be sure that you will have a steady and reliable fuel supply wherever you need it.
