

50cbm Containerized Refuel Facility With Self Priming Pump Tank

Our Product Introduction

For more products please visit us on refueling-equipment.com

Basic Information

- Place of Origin: China
- Brand Name: Virette
- Model Number: A1

Product Specification

- Tank Accessories: Manhole Cover, Emergency Valve, Level Gauge, Discharge Valve
- Tank Type: Horizontal
- Tank Shape: Cuboid
- Flow Rate: 50m³/h
- Color: Customized
- Pump: Self-priming Pump
- Tank Length: 11600mm
- Tank Surface Treatment: Sandblasting, Painting
- Highlight: 50cbm Containerized Refuel Facility, Self Priming Pump Tank Containerized Refuel, 50cbm Containerized Fuel Station

Product Description

Self-priming Pump Tank Containerized Refuel Facility for Quick and Easy Refueling

Product Description:

The main feature of the Container Fuel Station is the tank containerized refuel facility that is situated within a standard shipping container. The tank is made from high-quality carbon steel and has a diameter of 2700mm, making it large enough to store a significant amount of fuel. The tank is also available in a range of colors that can be customized to suit the needs of the customer.

The tank surface treatment for the Container Fuel Station is sandblasting and painting, ensuring that the tank is protected from corrosion and other environmental factors. This treatment also helps to maintain the aesthetic appeal of the product, ensuring that it looks great wherever it is located.

The Container Fuel Station is designed to be a horizontal tank, which not only makes it easier to transport and install, but also ensures that it is more stable and secure. This makes it ideal for use in areas with high wind speeds or seismic activity.

The Container Fuel Station is perfect for a wide range of applications, including mining operations, construction sites, and remote locations where access to fuel is limited. The product is also ideal for emergency response situations, where fuel is needed quickly and efficiently.

In summary, the Container Fuel Station is a mobile oil supply station that is designed to provide a fuel station on containerized base. The tank containerized refuel facility is made from high-quality carbon steel and is available in a range of colors that can be customized to suit the needs of the customer. The tank surface treatment is sandblasting and painting, ensuring that it is protected from corrosion and other environmental factors. The horizontal tank design ensures that the product is stable and secure, making it ideal for use in a range of applications.

Applications:

The Virette A1 Container Fuel Station is ideal for a variety of applications and scenarios. It can be used in remote locations where fuel supply is limited, such as in construction sites, mining operations, and agricultural areas. The containerized fuel distribution bases can be easily transported to the site, ensuring that fuel is readily available for use. It can also be used in emergency situations, such as natural disasters, where fuel supply is critical.

The Virette A1 Container Fuel Station is designed to provide a safe and reliable fuel distribution system. The tank is treated with sandblasting and painting, ensuring that it is protected against corrosion and other environmental factors. The tank is also equipped with a variety of safety features, including a spill containment system and a fire suppression system, to ensure that fuel is safely transported and stored.

The Virette A1 Container Fuel Station is easy to use and maintain. It can be easily transported using a standard truck or container trailer.

The fuel dispensing system is designed to be user-friendly and easy to operate. The container gas station is also equipped with a fuel management system that allows for remote monitoring and control of fuel usage and inventory.

In conclusion, the Virette A1 Container Fuel Station is a versatile and reliable solution for your fuel distribution needs. Whether you are in a remote location or an emergency situation, this mobile oil supply station is designed to provide you with a safe and efficient fuel distribution system. With its innovative design, safety features, and ease of use, the Virette A1 Container Fuel Station is the ideal solution for all your fuel distribution needs.

Customization:

Packing and Shipping:

Product Packaging:

Container Fuel Station

Instruction Manual

Accessories (if applicable)

Shipping:

Ships within 2 business days

Free standard shipping within the United States

International shipping available for an additional fee

Tracking number provided upon shipment

Shipping carrier: UPS, FedEx, or DHL

FAQ:

Q: What is the brand name of the container fuel station?

A: The brand name of the container fuel station is Virette.

Q: What is the model number of the container fuel station?

A: The model number of the container fuel station is A1.

Q: Where is the container fuel station manufactured?

A: The container fuel station is manufactured in China.

Q: What is the fuel capacity of the container fuel station?

A: The fuel capacity of the container fuel station varies depending on the model. Please refer to the product specifications for more information.

Q: Can the container fuel station be customized to meet specific requirements?

A: Yes, the container fuel station can be customized to meet specific requirements. Please contact our customer service team for more information.
