

Float Included Fuel Dispensing Pump 30 Min Duty Circle Fuel Pump

Our Product Introduction

For more products please visit us on refueling-equipment.com

Basic Information

- Place of Origin: China
- Brand Name: Virette
- Model Number: f0

Product Specification

- Duty Circle: 30 Min
- Type: Electric
- Sending Unit Included: No
- Float Included: Yes
- Weight: 15Kgs
- Sealing Ring Included: Yes
- Warranty: 1 Year
- Engine: Diesel Fuel Engine Parts
- Highlight: **Float Included Fuel Dispensing Pump,
Duty Circle Fuel Dispensing Pump,
30 Min Duty Circle Fuel Pump**

Product Description

Float Included Fuel Dispensing Pump 15Kgs Capacity for Smooth Operation

Product Description:

This fuel pump is compatible with a wide range of vehicles, making it a universal choice for those who need to transfer gasoline from one location to another. It can be used with cars, trucks, boats, and other vehicles, making it a versatile tool for those who work in a variety of industries.

The Electric Fuel Pump is equipped with a float, which helps to regulate the flow of fuel and prevent overflows. This makes it a safe and reliable choice for those who need to transfer gasoline on a regular basis. Additionally, the pump does not come with a sending unit, making it a more affordable option for those who do not need this feature.

Whether you are filling up your car at a gas station, or transferring fuel between tanks, the Electric Fuel Pump is an excellent choice. It can be used as a filling station dispenser, or a liquid fuel dispenser, depending on your needs. With its powerful motor and durable construction, this pump is sure to provide years of reliable service.

Overall, the Electric Fuel Pump is a versatile and reliable tool that is ideal for anyone who needs to transfer gasoline or other liquid fuels. Whether you are a mechanic, a farmer, or a boat owner, this pump is sure to meet your needs. So why wait? Order your Electric Fuel Pump today and experience the power and convenience of this amazing product!

Features:

Product Name: Fuel Pump

Inlet Type: Strainer

Type: Electric

Engine: Diesel Fuel Engine Parts

Sending Unit Included: No

Sealing Ring Included: Yes

This Fuel Pump is an electric gasoline infusion machine designed for use in fueling stations, filling station dispensers, and petroleum transfer stations. Its inlet type is a strainer and it is compatible with diesel fuel engine parts. The sealing ring is included, but the sending unit is not.

Technical Parameters:

Sending Unit Included	No
Duty Circle	30 Min
Sealing Ring Included	Yes
Outlet	NPT2"
Warranty	1 Year
Weight	15Kgs
Inlet Type	Strainer
Compatibility	Universal
Float Included	Yes
Type	Electric

This Fuel Pump is a component of an Electric Fuel Delivery System, compatible with Filling Station Dispensers. It includes a sealing ring and a float, and has an inlet type of strainer.

Applications:

The Virette f0 is a versatile fuel pump that can be used in various applications. It is commonly used as a gasoline transfer pump to move fuel from one location to another. The pump can be used to transfer fuel between storage tanks, fuel trucks, and other fuel storage containers. The Virette f0 is also used as a liquid fuel dispenser in fueling stations.

The fuel pump is ideal for use in scenarios where a reliable and efficient fuel delivery system is required. It can be used in agriculture, mining, construction, and other industries that require the use of diesel fuel. The Virette f0 is also suitable for use in emergency situations where fuel needs to be moved quickly and efficiently.

The Virette f0 is a robust and durable fuel pump that can withstand harsh environmental conditions. It is designed to handle high volume fuel transfer and dispensing operations. The fuel pump is easy to install and use, making it an ideal choice for both professional and DIY users.

In conclusion, the Virette f0 is a reliable and efficient fuel pump that can be used in various applications. Its versatility, durability, and ease of use make it an ideal choice for anyone looking for an electric fuel delivery system.
