Product Description

Duty Circle 30 Min Fuel Pump with Inlet Type Strainer and 15Kgs Capacity

Product Description:

With a weight of just 15Kgs, our Fuel Pump is lightweight and easy to handle. This makes it an ideal choice for those who need to transport it between different locations. And with an outlet of NPT2", you can be sure that you'll be able to connect it to your fuel line with ease.

Our Fuel Pump features an electric motor that provides a powerful and efficient transfer of fuel. This makes it a great choice for those who need to transfer fuel quickly and efficiently. Whether you're using it for personal or professional use, this Fuel Pump is sure to meet your needs.

And when it comes to compatibility, our Fuel Pump is designed to work with a wide range of vehicles. It is a universal solution that is suitable for use with diesel fuel injectors, gasoline infusion machines, and gasoline transfer pumps. This means that no matter what type of vehicle you have, our Fuel Pump is sure to work with it.

However, it is important to note that our Fuel Pump does not come with a sending unit included. This means that you will need to purchase this separately if you require it.

In summary, if you're looking for a powerful, reliable, and versatile Fuel Pump that can handle all your fuel transfer needs, then look no further than our Electric Fuel Pump. With its lightweight design, powerful electric motor, and universal compatibility, it is the perfect choice for personal and professional use.

Features:

Product Name: Fuel Pump

Engine: Diesel Fuel Engine Parts

Sealing Ring Included: Yes

Duty Circle: 30 Min

Float Included: Yes

Sending Unit Included: No

This Fuel Pump is a perfect fit for Petroleum Transfer Stations and Gasoline Infusion Machines. It is also compatible with Electric Fuel Delivery Systems.

Technical Parameters:

Inlet Type	Strainer
Compatibility	Universal
Weight	15Kgs
Warranty	1 Year
Duty Circle	30 Min
Engine	Diesel Fuel Engine Parts
Type	Electric
Float Included	Yes
Sealing Ring Included	Yes
Sending Unit Included	No

This Petrol Pumping Unit is a part of the Electric Fuel Delivery System and can be used in a Petroleum Transfer Station.

Applications:

The Virette f0 Fuel Pump is suitable for various occasions and scenarios. It is ideal for use in gas stations, fuel distribution centers, and industrial plants where fuel transfer is necessary. The pump's Inlet Type is strainer, which ensures that it can handle different types of fuel with minimal contamination risks. Additionally, its Outlet is NPT2", which makes it compatible with a wide range of hoses and nozzles.

The Virette f0 Fuel Pump is a versatile product that can be used for different purposes, including Diesel Fuel Injector applications. Its weight is 15Kgs, making it a portable option that can be moved around with ease. However, it does not come with a Sending Unit included in the package, meaning that it has to be purchased separately.

If you are looking for a reliable and efficient Fuel Pump, the Virette f0 is an excellent option to consider. Its robust construction and superior performance make it a worthwhile investment for businesses and individuals who require a dependable fuel transfer solution.
