

## Painted Container Fuel Station 50 CBM Portable Filling Station

Our Product Introduction

For more products please visit us on [refueling-equipment.com](http://refueling-equipment.com)

### Basic Information

- Place of Origin: China
- Brand Name: Virette

### Product Specification

- Tank Type: Horizontal
- Color: Customized
- Tank Diameter: 2700mm
- Capacity: 50m3
- Tank Surface Treatment: Sandblasting, Painting
- Flow Rate: 50m3/h
- Pump: Self-priming Pump
- Material: Carbon Steel
- Highlight: painted container fuel station, container fuel station 50 cbm, 50 cbm portable filling station

## Product Description

### Painted Carbon Steel Container Gas Station / Portable Fuel Supply Station with Horizontal 50m3 Tank

#### Product Description:

The Tank Containerized Refuel Facility comes equipped with a self-priming pump, which is capable of delivering fuel at a rate of up to 60 liters per minute. This pump is designed to provide reliable and efficient fuel transfer, making it ideal for use in remote locations or areas with limited access to traditional fueling facilities.

In addition to the self-priming pump, this product also includes a range of tank accessories, including a manhole cover, emergency valve, level gauge, and discharge valve. These accessories are designed to ensure safe and efficient fuel storage and dispensing, providing users with peace of mind and the ability to monitor fuel levels and flow rates at all times.

The Tank Containerized Refuel Facility is available in a range of colors, including customized options to match your specific branding or aesthetic preferences. This makes it an ideal solution for businesses looking to establish a visible and recognizable presence in remote or underserved areas.

Overall, the Tank Containerized Refuel Facility is a reliable, efficient, and cost-effective solution for fuel storage and dispensing. Its compact and portable design makes it easy to transport and install, while its robust construction and range of accessories ensure safe and efficient operation in any environment.

#### Features:

Product Name: Container Fuel Station

Flow Rate: 50m3/h

Tank Diameter: 2700mm

Pump: Self-priming Pump

Tank Accessories:

Manhole Cover

Emergency Valve

Level Gauge

Discharge Valve

Tank Type: Horizontal

This Mobile Oil Supply Station, also known as a container gas station, is equipped with a self-priming pump and horizontal tank with a 50m3/h flow rate and 2700mm diameter. The tank also features a manhole cover, emergency valve, level gauge, and discharge valve for added convenience.

#### Technical Parameters:

Product Attribute	Value
Flow Rate	50m3/h
Color	Customized
Tank Type	Horizontal
Capacity	50m3
Tank Shape	Cuboid
Tank Diameter	2700mm
Tank Length	11600mm
Tank Thickness	14mm
Pump	Self-priming Pump
Tank Surface Treatment	Sandblasting, Painting

#### Applications:

The Virette Container Fuel Station features a horizontal tank with a diameter of 2700mm. The tank is shaped like a cuboid, which maximizes the storage capacity of the fuel station. The tank is made of carbon steel, which makes it durable and long-lasting. The tank is sandblasted and painted to increase its resistance to corrosion and rust.

The Virette Container Fuel Station is suitable for a variety of applications and scenarios. Here are a few examples:

Construction sites: The Virette Container Fuel Station can be used to provide fuel for construction equipment and vehicles on-site. Its mobility allows it to be easily transported to different areas of the construction site.

Mining sites: The Virette Container Fuel Station is ideal for mining sites that are located in remote areas. The skid-mounted fuel station can be easily transported to the site and can provide fuel for mining equipment and vehicles.

Remote locations: The Virette Container Fuel Station can be used in locations that are far away from fuel stations. For example, it can be used in national parks, forests, and other remote areas where fuel is not readily available.

Emergency situations: The Virette Container Fuel Station is useful in emergency situations like natural disasters where fuel supply may be disrupted. It can provide fuel for emergency vehicles and equipment.

The Virette Container Fuel Station is a versatile product that can be used in various scenarios. Its skid-mounted design makes it easy to transport, while its cuboid shape maximizes storage capacity. It is a perfect solution for companies that require a container gas station

that can be easily moved from one location to another.

**Customization:**

**Packing and Shipping:**

**Product Packaging:**

The Container Fuel Station will be packaged in a sturdy, weather-resistant container to ensure safe transportation and storage. The container will be labeled with the product name and necessary safety information.

**Shipping:**

The Container Fuel Station will be shipped via ground transportation to the customer's designated location. The shipping cost will depend on the distance and weight of the product. The customer will be provided with a tracking number and estimated delivery date once the product has been shipped.
