Product Description

Universal Compatibility NPT2 Outlet Strainer Inlet Heavy Duty Diesel Fuel Dispensing Pump

Product Description:

This electric fuel pump is designed to deliver fuel with ease, making it perfect for use in a variety of settings, from powering generators and heavy machinery to filling up at a filling station dispenser. With its strainer inlet, this fuel pump is able to filter out any impurities in the fuel, ensuring that it flows smoothly and without interruption.

Whether you're looking for a fuel pump for personal or commercial use, our Electric Fuel Delivery System is the perfect choice. With its powerful motor and durable construction, it is able to deliver fuel quickly and efficiently, making it a must-have for any diesel fuel engine parts application. So why wait? Invest in our Electric Fuel Delivery System today and see the difference it can make for your fuel delivery needs!

Features:

Product Name: Fuel Pump

Inlet Type: Strainer

Sealing Ring Included: Yes

Compatibility: Universal

Duty Circle: 30 Min

Float Included: Yes

This Fuel Pump product is a versatile and reliable solution for your petrol pumping needs. With its strainer inlet type and included sealing ring, it ensures efficient and safe transfer of fuel. The universal compatibility and 30-minute duty circle make it suitable for various applications, whether it's for a petrol pumping unit, petroleum transfer station, or other fuel transfer requirements. The float included in the package adds convenience and ease of use, making it a great investment for your fuel transfer needs.

Technical Parameters:
