

11.6m Volume Container Refueling Station Cuboid Container Gas Station

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Virette

Product Specification

- Tank Shape: Cuboid
- Material: Carbon Steel
- Color: Customized
- Tank Length: 11600mm
- Pump: Self-priming Pump
- Tank Thickness: 14mm
- Tank Diameter: 2700mm
- Flow Rate: 50m³/h
- Highlight: cuboid container gas station,
container refueling station cuboid,
11.6m volume container refueling station

Product Description

11.6m Volume Capacity Cuboid Fuel Station Container With Customized Color Treatment

Product Description:

The Container Fuel Station is available in a customized color to match any company branding or color scheme. The tank type for this product is horizontal, which allows for a more compact design and easier transportation. The tank is made from high-quality carbon steel with a thickness of 14mm, which ensures durability and longevity. The tank surface treatment includes sandblasting and painting, which provides extra protection against corrosion and damage from environmental factors.

The Container Fuel Station is a versatile product that can be used in a variety of industries, such as construction, mining, and agriculture. The product is designed to meet the fuel storage and dispensing needs of these industries, making it an essential tool for daily operations. The product provides a safe and efficient way to store and dispense fuel, which reduces the risk of accidents and improves the overall efficiency of the operation.

The Container Fuel Station is a skid-mounted fuel station, which means that it can be easily transported and installed on site. The product is designed to be portable, which makes it perfect for temporary fuel storage and dispensing needs. The product is also ideal for remote locations where access to fuel is limited. The skid-mounted design allows for easy maneuverability, which makes it easy to move the product from one location to another.

The Container Fuel Station is a cost-effective solution for fuel storage and dispensing needs. The product is designed to be a Containerized Fuel Distribution Bases, which eliminates the need for expensive construction and installation costs. The product is also designed to be low maintenance, which reduces the overall cost of ownership. The product's durability and longevity ensure that it will provide years of reliable service, which makes it a smart investment for any business.

Features:

Product Name: Container Fuel Station

Material: Carbon Steel

Tank Thickness: 14mm

Tank Surface Treatment: Sandblasting, Painting

Capacity: 50m3

Tank Length: 11600mm

Features:

Tank Containerized Refuel Facility

Mobile Oil Supply Station

Portable Fuel Supply Station

Technical Parameters:

Product Attribute	Value
Product Name	Mobile Oil Supply Station
Product Type	Fuel Station On Containerized Base
Flow Rate	50m3/h
Tank Type	Horizontal
Material	Carbon Steel
Tank Diameter	2700mm
Tank Shape	Cuboid
Pump	Self-priming Pump
Tank Length	11600mm
Tank Surface Treatment	Sandblasting, Painting
Tank Accessories	Manhole Cover, Emergency Valve, Level Gauge, Discharge Valve
Capacity	50m3

Applications:

The Virette container fuel station is suitable for a wide range of scenarios such as construction sites, mining sites, military camps, and remote locations. It offers a convenient and flexible way to refuel vehicles and equipment on-site without the need for a fixed refueling station.

The tank containerized refuel facility is equipped with a horizontal tank that has a diameter of 2700mm, a length of 11600mm, and a thickness of 14mm. The tank is designed to store large volumes of fuel, ensuring that there is enough supply to meet the needs of the site.

The Virette container fuel station is customizable, and customers can choose the color that suits their preferences. The product is available in different colors, making it easy for customers to match it with their brand colors or existing equipment.

The tank containerized refuel facility is ideal for use in remote locations where access to fuel is limited. It provides a cost-effective and reliable solution for refueling vehicles and equipment on-site, reducing downtime and increasing productivity.

In conclusion, the Virette container fuel station is a versatile product that is suitable for various applications. Its portability, large fuel

storage capacity, and customizable design make it an ideal solution for customers looking for a reliable and cost-effective way to refuel their vehicles and equipment on-site.

Customization:

Our Fuel Station On Containerized Base is made of high-quality Carbon Steel from China, ensuring maximum durability and longevity. The tank thickness of our Fuel Station is 14mm, providing a reliable and safe storage solution for your fuel. With a capacity of 50m3, you can be assured that your fuel supply needs will be met.

Choose your own customized color to match your brand or company's image and specifications.

The Tank Type of our Mobile Oil Supply Station is horizontal, making it easier for transportation and installation.
