

Heavy Duty Electric Fuel Pump Duty Cycle 30 Minute And NPT2 Outlet

Our Product Introduction

For more products please visit us on refueling-equipment.com

Basic Information

- Place of Origin: China
- Brand Name: Virette
- Model Number: f0

Product Specification

- Duty Circle: 30 Min
- Inlet Type: Strainer
- Sealing Ring Included: Yes
- Outlet: NPT2"
- Type: Electric
- Warranty: 1 Year
- Sending Unit Included: No
- Weight: 15Kgs
- Highlight: **Heavy Duty Electric Fuel Pump ,
Electric Fuel Pump Duty Cycle ,
Fuel Pump Duty Cycle 30 Minute**

Product Description

Heavy Duty 15Kgs Electric Fuel Pump for Diesel Engines with 30 Min Duty Cycle and NPT2 Outlet

Product Description:

The Fuel Pump comes with a Float Included to ensure accurate fuel level readings. The Float is a critical component that helps to regulate the fuel level and prevent fuel overflow. It is recommended that the Float is checked regularly to ensure proper functioning and avoid any fuel leakage.

The Fuel Pump comes with an Outlet of NPT2" size, which is standard for most fuel dispensers. The Outlet is designed to provide a secure and tight connection to the fuel hose, preventing any fuel leakage. The NPT2" Outlet is compatible with most fuel nozzles, making it easy to use and install.

The Fuel Pump weighs approximately 15Kgs, making it lightweight and easy to install. The lightweight design makes it an ideal choice for portable fuel dispensers, which are commonly used in remote locations or for outdoor events.

The Fuel Pump does not come with a Sending Unit Included. The Sending Unit is responsible for monitoring the fuel level in the tank and sending the information to the fuel gauge. If a Sending Unit is required, it can be purchased separately and installed easily.

The Fuel Pump is a reliable and efficient electric fuel delivery system that ensures a steady flow of fuel to the Diesel Fuel Injector. It is an essential component of any Filling Station Dispenser, and its compatibility with most fuel nozzles makes it a popular choice among fuel dispensers.

Features:

Product Name: Fuel Pump

Type: Electric

Duty Circle: 30 Min

Compatibility: Universal

Engine: Diesel Fuel Engine Parts

Sending Unit Included: No

This Fuel Pump is an electric pump designed for use with diesel fuel engine parts. It has a duty circle of 30 minutes and is compatible with a wide range of vehicles. The Fuel Pump is a liquid fuel dispenser that is perfect for use in fuel dispensing pumps.

Technical Parameters:

Float Included	Yes
Type	Electric
Sealing Ring Included	Yes
Weight	15Kgs
Compatibility	Universal
Warranty	1 Year
Sending Unit Included	No
Outlet	NPT2"
Duty Circle	30 Min
Engine	Diesel Fuel Engine Parts

Applications:

Gas Stations: The Virette f0 fuel pump is the perfect solution for gas stations. It comes with an NPT2" outlet that makes it easy to dispense fuel into vehicles. The float and sealing ring included in the package make it easy to install and ensure that the fuel is dispensed accurately. It is also durable, ensuring that it can withstand the heavy usage that is expected in a gas station.

Construction Sites: Construction sites require a lot of fuel to power the machinery used. The Virette f0 fuel pump is an ideal choice for construction sites as it can dispense large volumes of fuel in a short period. The sealing ring included prevents any leaks, ensuring that the site remains safe at all times.

Boats: Boats require a reliable fuel dispenser to ensure that they can travel long distances without any issues. The Virette f0 fuel pump is perfect for boats as it is compact and portable. It can easily be installed on a boat and used to dispense fuel as required. The float included ensures that the fuel level is monitored at all times.

Agriculture: Farms require fuel to power tractors and other machinery used in the fields. The Virette f0 fuel pump is an ideal choice for farms as it can dispense fuel accurately and efficiently. It is durable and can withstand the harsh conditions experienced in a farm.

Emergency Situations: The Virette f0 fuel pump can also be used in emergency situations where fuel needs to be dispensed quickly. It is portable and can be easily transported to the location where it is needed. The sealing ring included ensures that there are no leaks, making it safe to use in any situation.

The Virette f0 fuel pump comes with a 1-year warranty, ensuring that it is a reliable product that can be used for a long time. Although it does not come with a sending unit, the float included ensures that the fuel level is monitored at all times. Overall, the Virette f0 fuel pump is a reliable and efficient liquid fuel dispenser that can be used in various application scenarios.

Customization:

Customize your Virette f0 Electric Fuel Delivery System with our Product Customization Services. Our Liquid Fuel Dispenser is made in China and has a weight of 15Kgs. The Duty Cycle is 30 Min, making it a reliable Petrol Pumping Unit. The Inlet Type is a Strainer and the Outlet is NPT2". Please note that the Sending Unit is not included.

Packing and Shipping:

Product Packaging:

1 Fuel Pump

Instruction Manual

Mounting Hardware

Shipping Information:

Shipping Weight: 2 lbs

Shipping Dimensions: 8 x 6 x 4 inches

Shipping Carrier: UPS

Estimated Delivery Time: 3-5 business days
