

LNG Gas Dispenser LNG-1000 with 50L/min Flow Rate for Harsh Environments

Our Product Introduction

For more products please visit us on refueling-equipment.com

Basic Information

- Place of Origin: China
- Brand Name: Virette
- Model Number: LD-1
- Minimum Order Quantity: 1 set
- Delivery Time: 20 days

Product Specification

- Power Supply: AC220V Or DC24V
- Accuracy: +1.0%
- Temperature Range: -40°C To 50°C
- Model: LNG-1000
- Rated Working Pressure: 16MPa
- Rating Power: <100W
- Ambient Humidity: 30%~90%
- Dispensing Flow Rate: 50L/min
- Highlight: **LNG-1000 LNG Gas Dispenser, Harsh Environments LNG Gas Dispenser, 50L/min LNG Gas Dispenser**

Product Description

Product Description:

With an ambient humidity range of 30%~90%, the LNG Gas Dispenser can function effectively in a wide range of environmental conditions. The dispenser has a rating power of less than 100W, which makes it highly energy-efficient and cost-effective to operate. The LNG Gas Dispenser is rated for a working pressure of 16MPa, which makes it suitable for use with high-pressure LNG systems. The dispenser is also equipped with a flow rate of (1~80) Kg/min, which ensures that LNG can be dispensed quickly and efficiently. The LNG Gas Dispenser is designed to be used in filling stations, where it can be used to dispense LNG to vehicles and other equipment. This dispenser is a reliable and efficient alternative to traditional diesel fuel injectors, as it provides a cleaner and more environmentally friendly fuel source. Overall, the LNG Gas Dispenser is an excellent choice for filling stations that want to provide their customers with a reliable and efficient way to dispense LNG. With its advanced features and high-quality construction, this dispenser is sure to provide years of trouble-free service.

Applications:

One of the most common applications for the Virette LD-1 LNG Gas Dispenser is in petroleum transfer stations. These stations require a reliable and efficient fuel dispensing pump that can handle the high volume of fuel that is being transferred on a daily basis. The LNG-1000 is designed to meet these needs, providing a powerful and efficient fuel dispensing solution that can handle even the busiest of petroleum transfer stations.

Another common application for the Virette LD-1 LNG Gas Dispenser is in filling station dispensers. These dispensers are used at gas stations around the world, providing a convenient and reliable way for customers to fill up their vehicles with fuel. The LNG-1000 is the perfect solution for these scenarios as well, providing a powerful and efficient fuel dispensing pump that can handle the high volume of fuel that is required at a typical gas station.

Whether you are looking for a fuel dispensing pump for a petroleum transfer station or a filling station dispenser for your gas station, the Virette LD-1 LNG Gas Dispenser model is the perfect solution. With a minimum order quantity of just one set and a delivery time of 20 days, you can have this powerful and efficient fuel dispenser up and running in no time.

So if you are looking for a reliable and efficient fuel dispensing pump that can handle even the busiest of scenarios, be sure to check out the Virette LD-1 LNG Gas Dispenser today!

Customization:

Keywords: Filling Station Dispenser, Diesel Fuel Injector, Gasoline Transfer Pump

Support and Services:

The LNG Gas Dispenser product comes with the following technical support and services:

24/7 customer support

Installation and commissioning services

Regular maintenance and repair services

Remote monitoring and diagnostics

Technical training for operators and maintenance personnel

Upgrades and retrofits to keep the product up-to-date

Our team of experienced technicians and engineers are dedicated to ensuring the safe and reliable operation of your LNG Gas Dispenser. Contact us for any technical assistance or service inquiries.
